

Cybernet iOne M12

12" Power over Ethernet All In One PC

A Low Power Consumption Computer

By utilizing lower power consumption components and fanless cooling technology, the iOne M12 has the ability to be powered by an Ethernet connection. This eliminates the need for a power outlet, making this an extremely versatile all-in-one PC.

Built for Business

Intel Core Processor

The Cybernet iOne M12 comes with a powerful Intel Quad Core Bay Trail processor, integrated Intel graphics, and up to 8GB of RAM, making this a powerhouse business computer.

Engineered for Reliability

All of our enterprise computers are constructed with industrial grade components, resulting in a less than 2% failure rate, much better than a standard commercial grade PC.

VESA Compatible

Use a standard desktop stand or take advantage of built in VESA 75/100 compatibility to mount to a wall, cart or virtually anywhere else.

True PoE Functionality

Thanks to low power consumption components, the iOne M12 has the ability to be powered over an Ethernet cable. This unit is extremely energy efficient and environmentally friendly. It is also more versatile due to the fact that the iOne M12 can be mounted anywhere that is wired with Cat6 cable. This saves you the trouble of having to try and install new power outlets, allowing for much more flexibility when designing your workspace.

Incredible Versatility

Due to the fact that it doesn't need AC power, the iOne M12 is extremely versatile. Use it for digital signage in a retail setting or as a countertop POS system. You can also use it as a security camera monitor. The possibilities are nearly endless with this PoE computer.

Built with Customization & Compatibility in Mind

- Windows 7, 8, 10, IoT, or Linux
- Intel Quad Core Processor
- 1 x Full-Sized Mini PCI Express Slot
- 1 x Half-Sized Mini PCI Express Slot
- 1 x 128GB SSD up to 512GB
- 1 x DDR3L SO-DIMM (up to 8GB)
- 4 x USB 3.0 Ports, 1 x HDMI, 2 x LAN
- 1 x RS232 Serial Port (Expandable to 4 COM Ports)
- 5 Megapixel Webcam
- Optional Internal UPS Backup Battery
